VIORA AI

TRAIN SMARTER. CLICK SAFER.

AI-powered phishing simulation & training for Pakistan's digital workforce

Minam Faisal | Abdullah Abubaker | Maheen Mansha | Arsh Malik

PHISHING: UNDETECTED, UNTRAINED, UNPREPARED

- Over **60% of cybercrime complaints in Pakistan** in **2023** were phishing-related (FIA)
- **Smishing scams** alone caused losses of over **PKR 50 million**
- **Employees remain the weakest link** – unaware, undertrained, and easily tricked
- **SMEs and educational institutions** lack structured security training
- Existing awareness methods? **Generic**, **passive**, and **forgotten**

ONE CLICK IS ALL IT TAKES TO BREACH A COMPANY'S ENTIRE INFRASTRUCTURE

TURNING HUMAN ERROR INTO HUMAN DEFENSE

- **AI-powered phishing simulations** that mimic real-world attacks targeting Pakistan
- **Gamified training:** Employees earn scores, ranks & rewards after each simulation
- **Instant micro-lessons** triggered after a failed simulation — learning in the moment
- **Localized content:** Scenarios crafted around local brands, scams & cultural patterns
- **Compliance dashboards** to support PECA and future data protection laws

BUSINESS MODEL CANVAS

BUSINESS MODEL CANVAS

Designed For: Project Pitch | **Designed By:** Viora Team | **Date:** 2/05/2025 | **Version:** 01

KEY PARTNERS

- **Cloud providers** (AWS)
- **Cybersecurity consultants** (local intel, legal advisory)
- **Incubators & SME networks** (e.g., NIC, Plan9)
- **Future:** banks, telcos, training orgs for outreach & CSR tie-ins

KEY ACTIVITIES

- Platform dev & threat-based content
- Customer support & performance tracking
- Marketing, sales, and compliance updates

KEY RESOURCES

- AI devs, cybersecurity team, sales/support
- Proprietary phishing engine & content library
- Cloud infra (AWS), dashboard, seed funding

VALUE PROPOSITIONS

- ***"Train Smarter. Click Safer."***
- **AI-powered phishing simulations** & real-time micro-lessons
- **Context-aware attacks** based on local scam patterns & trends
- **Gamified learning**: scores, leaderboards, rewards
- **Compliance-ready**: PECA/data law alignment
- **Affordable, ready-to-deploy** SaaS for SMEs & enterprises

CUSTOMER RELATIONSHIP

- Self-onboarding with support
- Performance reports & micro-updates
- Account managers for enterprise clients

CHANNELS

- Digital outreach, demo portal, SaaS subscription
- Cloud-based delivery, instant setup, in-app support

CUSTOMER SEGMENTS

- **SMEs in Pakistan** (90% of businesses, low security maturity)
- **Banks**, **FinTechs** & **Public Sector** (compliance-driven)
- **Private schools/universities** (rising phishing risk)
- **Key Users:** IT managers, HR heads, compliance officers (30–55 yrs)
- **Segmented B2B market** with potential future self-service expansion

COST STRUCTURE

- **Fixed:** salaries, cloud infra, AI model tuning
- **Variable:** marketing, support ops, training content
- **Initial investments:** MVP dev + campaign launch
- **Lean infrastructure + scalable pricing = startup-friendly runway**

REVENUE STREAM

- **Subscription-based model** (monthly/annual)
- **Tiers:** Basic (SMEs), Pro (corporates), Enterprise (custom)
- **Add-ons:** custom templates, analytics, multi-location deployment
- **Future:** B2G licensing & compliance bundles

Existing tools are **too expensive**, **foreign**, or **irrelevant** for the local market

New data protection laws (e.g., PDPA) will soon mandate awareness training

Cybercrime in Pakistan surged **83%** over the past **3 years** (FIA, PTA)

Phishing is the **#1 reported threat**, accounting for **60%+ of cyber complaints**

Over 4.5 million SMEs in Pakistan — most lack structured cybersecurity awareness

AN URGENT,

UNDERSERVED MARKET IN PAKISTAN'S CYBER LANDSCAPE

A rising threat, a massive audience, and no truly local solution — until now.

COMPETITIVE ADVANTAGE

Feature/Criteira	KnowBe4	Cofense	CyberSafePK	Viora
AI-Driven Simulations	Limited	Pre-built templates	None	Adaptive AI generated phishing based on trends
Localization, Gamification & Rewards	Global focus only	Not localized	Partial Urdu support	Fully localized content, attacks, & training
Compliance Support (PECA)	None	None	None	Engaging leaderboards, points, and micro-rewards
Real-time Micro-lessons	Delayed	Training is separate	No feedback loop	Instant bite sized training upon simulation fail
Pricing Accessibility	Expensive (Enterprise Level)	Mid-to high (USD based)	Low	Affordable tiers for SMEs & education sector

GO-TO-MARKET STRATEGY

TARGET CUSTOMERS

- **SMEs:** Under-resourced, high-risk, need plug-and-play solutions
- **Enterprises:** Banks, FinTechs, telcos, and healthcare — compliance-driven
- **Government & Education:** Sensitive data, rising digital adoption

ACQUISITION CHANNELS

- **Digital Ads:** LinkedIn & Meta targeting IT, HR, and compliance leads
- **Webinars & Reports:** Lead gen via phishing challenges and trend briefings
- **Demo Portal:** Low-friction trials for conversion
- **Partnerships:** Incubators (NIC/Plan9).

FINANCIAL PROJECTIONS

Year	Clients (avg.)	Revenue (PKR)	Expenses (PKR)	Net Profit/Loss
2025	20	1.8M	2.8M	-1.0M
2026	100	12M	5.0M	+7.0M
2027	250	30.55M	7.25M	+23.3M

A Lean, Scalable Model — Break-even by Year 2

RISK ASSESSMENT

VIORA AI IS BUILT NOT JUST TO LAUNCH — BUT TO ENDURE.

- AI may generate irrelevant or low-quality phishing emails
- Downtime or delivery issues
- Global competitors entering the Pakistani market
- Low awareness among SMEs

Cybersecurity starts with people — and we're here to train them smarter, one simulation at a time."
